Flexible Packaging ALUMINIUM

Category: Flexible Packaging
Availability: **estimated time of delivery 30.11.2026**

Price: 0,00€

Short description

The aluminium structure gives the foil a high degree of impermeability and offers complete protection against light.

It is the perfect choice when we want to provide a 100% barrier for all types of gases, liquids (moisture) or light. Perfectly reflects infrared rays. It is very rarely used as a standalone, as it breaks if folded. It is used in many applications: lids for dairy products, coffee, flavored beverages, cosmetics, food, confectionery and ready meals, soups, sauces, canned and liquid foods, and pharmaceuticals.
