Self-Adhesive Film Laser PP Matt White Permanent SRA3 / 100 Sheets

Category: Selfadhesive film
Availability: **estimated time of delivery 30.11.2026**
code: **351**

Price: 70,93€

Technical specifications

Material: Propylene
Surface: Matt White
Quantity: 100 sheets
Size: 320 x 450 mm

Short description

The Self-Adhesive Film Laser PP Matt White Permanent is a high-performance polypropylene (PP) film designed for laser printing applications that demand durability, clarity, and a professional matte finish.

This product is perfect for creating long-lasting labels that maintain their appearance and adhesion even under challenging conditions.
Key Features:
• Polypropylene (PP) Film: Made from durable PP material, this film offers excellent resistance to moisture, chemicals, and tearing. This ensures that your labels remain intact and legible over time, even in environments where durability is a priority.
• Matte White Finish: The matte white surface of the film provides a non-reflective, elegant appearance, making it ideal for labels that need a subtle, professional look. The finish also enhances print clarity, ensuring that text and graphics stand out.
• Permanent Adhesive: Equipped with a strong permanent adhesive, this film sticks securely to a variety of surfaces, including plastic, metal, glass, and cardboard. Once applied, the adhesive ensures that the label stays in place, even in demanding conditions.
• SRA3 Size Format: The sheets are provided in the SRA3 size, offering ample space for large labels or multiple smaller labels on a single sheet. Each pack contains 100 sheets, making it suitable for both small and large labeling projects.
• Laser Printer Compatibility: Specifically designed for use with laser printers, this film ensures optimal print quality with sharp text and vibrant colors. The material is engineered to withstand the heat and pressure of laser printing, preventing smudging or warping.
Applications:
• Product Labels: Ideal for labeling products that require durable, moisture-resistant labels, such as in the food and beverage, cosmetics, or chemical industries.
• Outdoor Labels: Suitable for outdoor labeling applications where exposure to the elements is a concern, as the PP material and permanent adhesive provide excellent weather resistance.
• Industrial Use: Perfect for labeling machinery, equipment, and other industrial items that require long-lasting, legible labels.
The Self-Adhesive Film Laser PP Matt White Permanent SRA3 is the go-to solution for anyone needing high-quality, durable labels that can withstand tough conditions while maintaining a professional appearance. Whether for product labeling, industrial use, or outdoor applications, this film delivers reliable performance and lasting results.
